**Subject:** Microsoft Settlement

This settlement is too much punishment for Microsoft. This is a world of competition, and because of it we have the software and hardware that we do today.

Perhaps Microsoft has used some less than perfect marketing methods, but what is clear is that they do provide reasonably priced excellent software.

To make them split their software applications would hurt the consumer.

I urge you to complete the agreed upon settlement and don't deter Microsoft from continuing to produce the software we all use every day.
